

## **AMENDMENTS TO THE SPECIFICATION**

Please insert the following paragraph on page 5, line 21 of the specification:

Fig. 11 is a flowchart of a process for classifying anomalies of the sample surface to illustrate an embodiment of the invention.

Please insert the following paragraph on page 21, line 5 of the specification:

Fig. 11 is a flowchart of a process for classifying anomalies of the sample surface to illustrate an embodiment of the invention. As shown in Fig. 11, information concerning the anomalies is obtained in the manner described above using one of the different apparatuses referred to above (block 502). The information is then processed using a first threshold and processed using a second threshold different from the first threshold to provide two outputs (block 504). The outputs are analyzed and the anomalies are classified in at least one classification (block 506).
